PROFESSIONAL SUMMARY

Administrator with experience in customer service and retail who has worked in software development and IT in the past. Proficient in using the Microsoft Office package, CRM and database systems. Reliable and precise data handler with experience of conducting stock reconciliation and effective communications in hectic situations. Interested in working in a full-time Office Administrator or Customer Service Coordinator position.

SKILLS

- Customer service skills include welcoming and assisting customers in person and over the phone, dealing with queries on peak days.
- Administrative skills include data entry, filing, report preparation and process documentation.
- Systems and digital skills include using Microsoft Office (Excel, Word, Outlook), Power BI, CRM and database systems; Master's degree in IT with a background in software development.
- Precise: counting stocks in over 12 locations, with an excellent and constant record of precision.
- Organised: taking care of customer service, administrative and stock work at the same time without losing attention to details.
- Independent operation: capable of managing the whole shop independently, including security and closing procedures.

WORK HISTORY

Supermarket Assistant — PAK'nSAVE Kapiti, Wellington, NZ *Feb 2025 – Present*

- Provided support to customers within the shop floor and counter services throughout the shift, addressing any customer concerns immediately and ensuring smooth service during peak hours.
- Conducted check of expiry dates and rotation of stocks every day at the store level, minimising risks associated with losses in stock and ensuring adherence to food safety norms over 17 months.
- Used cardboard and plastic balers along with managing the restocking of trolleys outside the store, thus assisting waste management practices and ensuring the safety of working environment at the store.

Inventory Stocktaker (Casual) — RGIS, Wellington, NZ *Jan 2025 – Present*

- Conducted stock counts in 12 retail and supermarket stores, including pre-dawn and post business hour deployments, with zero errors and minimal recounting of 2 incidents in total across all sites.

Store Person (Part-time) — Prime Convenience, Wellington, NZ *Oct 2024 – Feb 2025*

- Conducted opening and closing activities of the store independently over approximately 85 shifts across 4 months, with 1 month when I was responsible for store's security and closing procedures alone.
- Managed inventory levels, making sure that no stock-outs occur and products were consistently available through all shifts.

Software Developer — Casepoint Pvt. Ltd., Surat, India *Jan 2023 – Sept 2024*

Progressed from intern to full developer role within 6 months

- Created and documented an automated scheduling system that reduced manual tasks for other departments by 40%, allowing those non-engineering staff members to execute the process independently.
- Increased system response time by approximately 1.5 seconds in heavy traffic workflow by refactoring of processing algorithm and optimisation of database queries.
- Rolled out technical fixes for non-technical users and provided clear documentation and explanations of the issues and fixes to avoid further escalation of problems.
- Documented processes and created technical guides for internal use by other departments.

PROJECTS

Eskra — College Magazine Website | *HTML, CSS, JavaScript, PHP, Tailwind CSS, Adobe Illustrator*

- Built and deployed a college magazine website as part of a design and development team, covering front-end implementation, content layout and original visual graphics; served as the college's live digital publication platform (now retired).

EDUCATION

Master of Information Technology — Whitecliffe College, Wellington, NZ (2024 – 2025)

Relevant coursework: Cybersecurity, Data Analysis, Information Security Standards, Technology Management

Bachelor of Computer Science — Gujarat Technological University, India (2019 – 2023)
